

JC METALWORKS:
Your partner in
high-quality fabrication
for digital kiosks

OUR EXPERTISE:

From design to production

JC Metalworks is a leading UK manufacturer of metal enclosures for digital kiosks and signage. We have partnered with many top brands to deliver exceptional, fabricated kiosks that are aesthetically pleasing and functionally superior.

PRODUCT DEVELOPMENT & PROTOTYPING

With over 35 years of extensive experience in metal fabrication and manufacturing, we are well-equipped to handle the complex requirements of digital kiosks. We excel in creating metalworks for fully functional prototypes, ensuring a seamless transition from concept to final product. We ensure that the final product is visually appealing,

structurally sound, and aligns with your vision and requirements.

DESIGN OPTIMISATION

Our design engineers and metal fabrication team optimise kiosks and signage for function and aesthetics, considering structural integrity, ease of assembly, and branding guidelines to create kiosks that excel in every aspect.

We understand the requirements and purposes, including the target audience, location and intended functionality.

We collaborate closely with you to develop a design that aligns with your vision and effectively communicates your message.

DURABILITY & RELIABILITY

We build kiosks to withstand high traffic and continuous use. As they are often located outdoors in high-traffic areas, we can work with you to create units that withstand environmental factors and potential tampering.

As kiosks have screens, touch panels, buttons, and other sensitive electronic components, our robust frameworks support and protect these elements, allowing them to be used safely and reliably.

We employ quality manufacturing processes, appropriate materials and advanced techniques to ensure the structural integrity and longevity of the kiosks we manufacture.

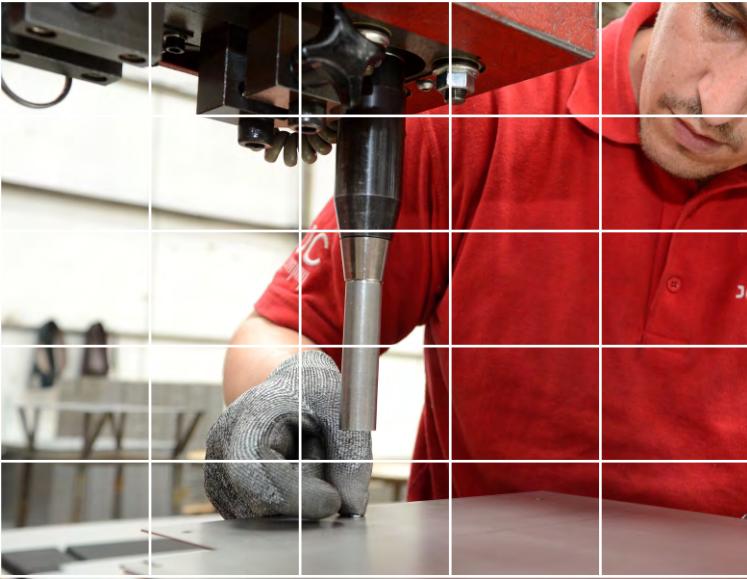

PRECISE AND ACCURATE METAL MANUFACTURING

We have the skills, expertise, and latest cutting-edge technology in metal fabrication required to achieve unmatched precision in every step of the process. This guarantees perfect-fitting components and a flawlessly finished product.

MODERN, SLEEK AND FLAWLESS FINISHED METALWORK

The physical appearance of self-service kiosks and signage is essential for attracting users and conveying a professional image. Our designs will match your aesthetic to create a clean, visually appealing finish.

We pay close attention to every detail. Our expert welders and operatives ensure clean welds, meticulous finishing, and a flawless powder coat finish. These efforts enhance the overall appearance of the kiosks and signage, ensuring they have a well-finished and sophisticated look.

Seamless integration of electronics and technology within bespoke metal enclosures

Our design engineers assess the custom electronic components required for digital kiosks, such as screens, touch panels, sensors, and connectivity options. This ensures that the manufacturing design allows for seamless integration and proper functionality.

Quality assurance and compliance of metalworks for digital kiosks and signage.

JC Metalworks has stringent quality control processes to ensure that each component and finished product meets the highest standards. We have held ISO certification since 2002 and we are ISO 9001:2015 and ISO 14001:2015 certified by a UKAS Accredited Certification Body.

We take pride in delivering high-quality products and ensuring customer satisfaction. Each component when finished undergoes thorough inspections, testing, and verification to meet the highest industry standards, safety regulations, and client specifications.

WE DELIVER:

Competitive lead times

We leverage cutting-edge technology to achieve fast turnaround times, allowing you to get your kiosks to market quickly.

Customisation & assembly

We specialise in both bulk orders and high-quality prototypes, ensuring consistent quality and on-time delivery for repeat orders.

Competitive Prices

We offer competitive pricing for our high-quality kiosk fabrication services, ensuring you get exceptional value for your investment.

Exceptional customer service

We prioritise clear communication and collaboration throughout the process.

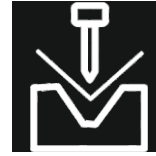

Our services include:

Metal cutting & punching

We use state-of-the-art machinery to cut and punch metal components for kiosk enclosure fabrication with precision.

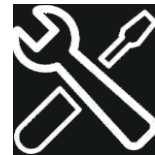

Forming

We utilise advanced metal bending technology, including three Amada press brakes, LVD Ultimate panel bending, Salvagnini PX4 machines, and an automatic HRB-

Welding

Our certified TIG, MIG, spot and robotic welding ensures robust and aesthetically pleasing welds that create a strong and secure kiosk

Assembly

Our experienced team meticulously assembles all kiosk components, ensuring a perfect fit and flawless finish.

Powder coating

We offer a wide variety of high-quality powder coat finishes to create a durable and visually appealing exterior for your kiosk.

Packaging & dispatch

We take pride in secure packaging to protect your kiosks during transport. We also efficiently handle dispatch to get your kiosks delivered on time.

Are you interested in our metalworks for digital kiosks and signage?

Contact JC Metalworks today to discuss your project requirements. We offer a wide range of kiosk solutions, including:

- **Touchscreen kiosks**
- **Information kiosks**
- **Interactive kiosks**
- **Check-In kiosks**
- **And many more**
